**CHEETAH**

**TELE RADIO®**  
REMOTE CONTROL 

**instant notification.**

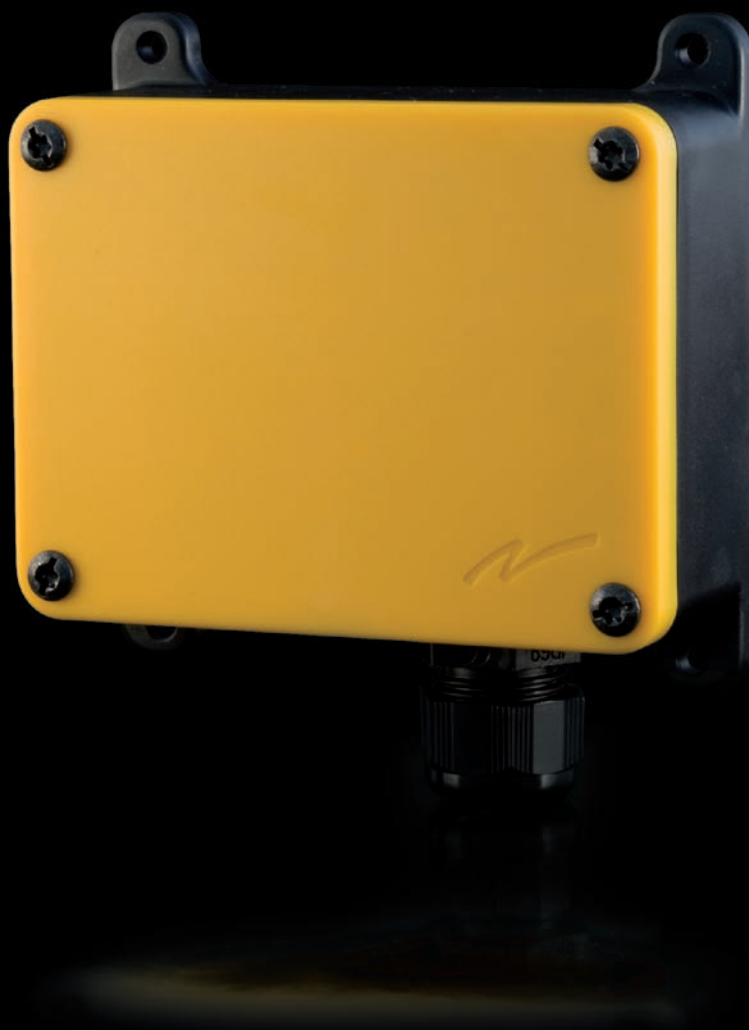

When you need a fast response and the distance is long, **Cheetah** saves you from unnecessary travel and time loss.

Controlling objects over long distances is now easier than ever with Cheetah and includes the possibility of sending messages to and from the unit. Save time and money by getting alarm signals sent directly to your cell phone. The signals are user-programmable, and it is possible to send a text message back in response.

**Cheetah** works both indoors and out. With it's rugged IP 65 housing you always have mounting options, when there is access to a power supply.

**Cheetah's** low current consumption makes it ideal to install where only solar power is accessible, or where the power supply is undependable and a UPS is installed.

# The Cheetah GSM 1.

- Triple band GSM unit, supports EGSM900, DSC1800 and PCS1900.
- Low power consumption, can accept solar power<sup>†</sup>.
- 2 relay outputs for application control.
- 4 digital inputs.
- Up to 256 users for control functions.
- Up to 4 different alarm recipients.
- Password protected.
- User programmable text messages.
- Industrial, municipal and home use.
- Accepts 7,5 - 24V DC power supply.
- Decreases machine downtime with fast alerting.
- Rugged IP 65 classed housing.
- Tolerates wide range of temperatures.

<sup>†</sup> - within accepted power supply range

**Automation control.**

**surveillance & gate control.**

# The specifications.

GSM	GSM I
Frequency (MHz)	900, 1800, 1900
Digital inputs	4
Functions	2
Internal antenna	Yes
Power source	7,5 - 24V DC
Power consumption	~200mA
IP class	IP65
