Functions

Parts counting	Statistics	Density determination	Labelling	Smart select
Dosing	Differential weighing	Peak hold	Percent weighing	Alibi memory
Checkweighing	Animal weighing	Pre-packaged goods control	Proximity sensors	Replaceable units
Formulations	Totalizing	Statistical quality control	Transactions	Multilingual menu

Features

Ergonomics and Comfort of Operation

The indicator is equipped with 5.7" colour TFT touchscreen, ensuring perfect readability, and membrane keypad. The device features two proximity sensors placed at the front of the housing, which can be freely configured using the menu. The proximity sensors enable touch free operation making your work even more comfortable, and help to keep the indicator clean.

Ingress Protection

The standard version of the indicator, PUE 7.1, features plastic housing for which the ingress protection is IP43. The panel version, i.e. PUE 7.1P indicator, is equipped with housing made of stainless steel, rated with IP66/67. The stainless steel model can be installed in a control panel or a switchboard.

Vast Range of Applications

Indicator software offers numerous working modes designed to perform various weighing processes such as parts counting, dosing, formulations, transactions or determination of density of solids. The

indicator can be an integral part of many scales and weighing systems operating in various branches of industry.

Communication Interfaces

PUE 7.1 and PUE 7.1P indicators are equipped with RS232, USB-A and Ethernet interfaces and with 4 digital inputs and outputs. This facilitates both cooperation of the indicator with peripheral devices and data exchange using USB drives. The PUE 7.1 comprises Wi-Fi® allowing the indicator to connect with wireless networks.

High Efficiency

The indicator features 1,2 GHz quad-core processor, 1 GB RAM and Linux. With this high efficiency operation is guaranteed.

Accessories

Peripheral Devices

- Epson dot matrix printer
- label printers Zebra
- WWG-2/5 large-size display
- LCD – WD-4/4 display (backlit)
- stack light
- keyboards, external switches
- transponder card scanner
- barcode scanner

Weighing Platforms

- 1 load cell platforms
- 4 load cell platforms
- high resolution platforms

Cables, Converters

- RS-232 – P0108 cable (scale - indicator)
- RS-232 – P0167 cable (scale - indicator)
- RS-232 – PT0301 cable (scale - indicator)
- RS-232 – P0151 Epson printer cable
- RS-232 – P0183 Zebra printer cable
- IN/OUT – PT0128 cables
- USB cable type A-B
- Ethernet cable
- AP2-1 – current loop unit (in stainless steel housing)
- K0047 – cigarette lighter cable

Remaining accessories

- stands for indicators

Dedicated Software

R-LAB

- collecting measurements
- carrying out statistical analysis of measurements
- customized graphs and reports

Label Editor R02

- designing label templates
- sending graphics and fonts to label printers
- printing label templates using connected printers

E2R PGC

- synchronization of databases, operators, products schedules
- record of measurements and PGC controls carried out on weighing instruments linked in ETHERNET network
- quality assessment of pre- packaged goods based on acquired data

E2R Weighing Records

- complete, automated databases synchronization
- fully supported processes of labelling and parts counting
- record of weighings, weighings archiving
- basic and advanced (with graphs) reports

E2R Formulations

- carrying out simple formulations
- support of an advanced formulations orders function
- warehouse management
- optional automatic dispensing and constant correction of the dispensing process
- control of an ingredient using the barcode scanner

E2R Weighings

- record of measurements carried out using the weighing indicators
- online monitoring of the production lines
- weighing thresholds control
- employees working time reporting

RAD KEY

- Establishing cooperation between a weighing instrument and a computer

R.Barcode

- The basic function software is presentation of the data sent by barcode scanners connected to PC via USB or RS232

Radwag Development Studio

- presentation of functions (and subfunctions) of communication protocol (Common Communication Protocol)

- possibility of connection with weighing equipment on which each function is carried out,
- library with mass control, contained within the development environment
- complete documentation of the communication protocol
- set of user manuals for different solutions addressed for programmers employed in companies using RADWAG-manufactured weighing equipment

RADWAG Connect

- establishing communication with all balances, scales and weighing modules using Common Communication Protocol
- communication via local network,
- support of basic functions
- auto searching for devices
- connecting with few devices simultaneously, swapping between them
- clear list of connected platforms
- record of measurements in the program,
- export of carried out measurements to CSV file,
- work performed using freely selected device with Windows 10

LabView Driver

- operation of RADWAG balances in LabView environment

RADWAG Remote Desktop

- remote operation via computer, mobile phone or tablet
- sending text messages
- version for Windows 10 and Android systems

Parameters Editor

- remote change of parameters
- remote on-line preview of the display
- displaying current mass indication
- software update
- file loading, editing and saving parameters to a file
- import and export of parameters
- interfaces: RS232, Ethernet and Wireless Connection.
- quick and easy edition of balance parameters using computer.

Audit Trail Reader

- support of Audit Trail function available for 3Y, 4Y, HY10, WLY, WPY series weighing instruments
- record of operator's activity from the moment of logging in
