

RD SERIES - REMOTE DISPLAY

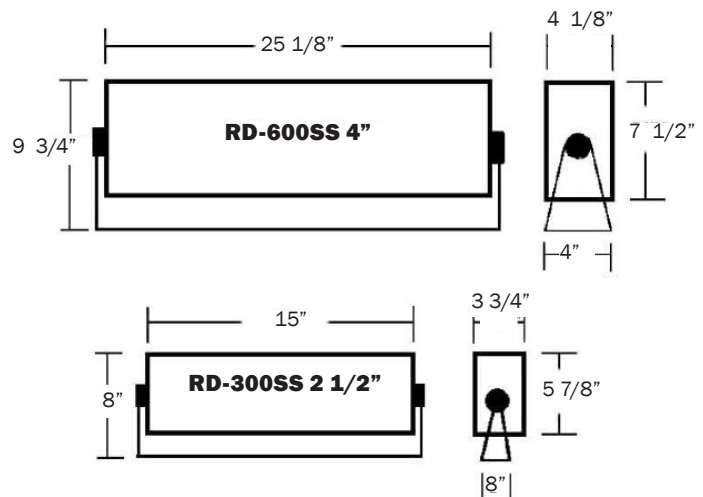

The RD series remote displays provide fast and accurate weight readings using bright, easy to view red LED numerals. These remote displays are ideally suited for truck scales, warehouse applications or any environment where sunlight and/or harsh ambient conditions are a factor. The RD300 is available with 2.25" high digits and the larger RD-600 uses 4" digits. Both remote displays are housed in highly durable NEMA 4X stainless steel enclosures and include a wall mount swivel bracket. Installation of the RD series is the easiest in the industry. Utilizing a unique "learn mode" the RD series remote displays analyze the incoming serial data stream and automatically set their own internal parameters. That's all there is to it! The RD Series are fast to setup and easy to use. With high reliability and low prices, the RD remotes offer maximum value.
