

# T series Platforms

**DINI ARGEO**  
Scales - Weighing systems

Small and medium capacity electronic weighing platforms with a AISI304 stainless steel surface, adjustable resting feet, level, and approved load cell.

CE **M** 3000e  
3000 + 3000e  
6000e  
6000 + 6000e

The T series platform is the ideal solution for accurate weighing of small and medium sized objects.

**Available upon request:**  
**6000e approved version or**  
**6000 + 6000e multirange version.**

The very sturdy and reinforced frame, with a new and revised shape, guarantees optimal weighing also with off-center loads, with a reduced weight and height of the platform in comparison to the previous version.

The T series platforms are also designed for realizing automatic weighing systems, allowing to mount roller units or conveyor belts on the weighing surface.

## ATEX version for environments classified as hazardous

The new T series platforms are suitable for use in environments classified at risk of explosion, thanks to the following options

> **CCATEX** certificate: guarantees the safety of the load cell, which is submitted to all the checks required by the law.

> **DCATEX2GD** (zones 1 and 21) or **DCATEX3GD** (zones 2 and 22): When combined with a Dini Argeo ATEX indicator, it is possible to request the declaration of conformity of the complete weighing system, providing to the customer a "turnkey" system compliant with the local legislation.
