Important Notice

By using your Nokia Body you expressly agree to the Nokia® Services Terms and Conditions available on our [website](#).

Minimum Requirements

Internet Access

Access to the Internet is required to:

- Download the Health Mate® app,
- Set up your Nokia Body,
- Upgrade the firmware.

For more details, refer to [“Specifications” on page 51](#).

We recommend using the app on a device connected to the Internet to enjoy all features.

Smartphone or Device

An iOS device (with operational Bluetooth and Wi-Fi or 3G/4G) is required to:

- Set up your Nokia Body,
- Retrieve data from your Nokia Body,
- Access specific functions of your Nokia Body.

Bluetooth Low Energy (BLE) compatibility is recommended to install your Nokia Body.

For more details, refer to [“Specifications” on page 51](#).

OS Version

You need iOS 8 or higher to install and run the Health Mate® App.

Health Mate® App Version

We recommend that you use the latest available version of the Health Mate® app to have all the latest features available.

Nokia Body Description

Overview

The Nokia Body allows you to easily track your weight and monitor your progress. Not only does it let you know how much you weigh, it also calculates your Body Mass Index (BMI) to give you a better idea of where you stand as far as weight-related risks are concerned.

Of course that's not all your Nokia Body does. If you activate the Weather screen, you also get your daily weather report everytime you weigh in.

Because the Nokia Body is a connected scale, its true potential is achieved when you use it along with the Health Mate® app. Beside allowing you to install your scale, the Health Mate® app allows you to customize its display, to set a weight goal, and to check the entire history of your weight data.

Thanks to its in-app activity tracking feature and the numerous partner apps you can connect it to, the Health Mate® app helps you reach your weight goal faster by helping you track your activity and check your calorie balance.

Scale Screens Description

You can select a number of screens to be displayed on your Nokia Body:

- Weight: Displays your weight. This screen cannot be disabled.
- BMI: Displays your Body Mass Index.
- Weather¹: Displays the weather for the day.
- Steps^{1, 2, 3}: Displays the number of steps you did the previous day.

You can disable or change the order of these screens as you like after you install your Nokia Body. Otherwise, they will appear in the default order. Refer to [“Changing the screen order” on page 23](#) for more information.

¹ This screen can only be used if you set up your Nokia Body in Wi-Fi.

² You either need to own a Nokia® tracker, or to use the in-app tracking of the Health Mate® app to display your number of steps on this screen. If you don't have a Nokia® tracker, tap on Activity in your Dashboard in the Health Mate® app and tap **Activate now**. Your mobile device will then start tracking your steps.

³ You need to have a Nike+ account to see the amount of NikeFuel you have on this screen.

Setting Up the Nokia Body

Installing the Health Mate® App

If the Health Mate® app is not already installed on your device, perform the following steps:

1. Go to healthapp.nokia.com in your device's web browser.
2. Tap **Download on the App Store**.
3. Tap **GET**.
The installation process starts.

Installing Your Nokia Body

Overview

Installing your Nokia Body in Wi-Fi gives you access to all the features and screens available. Installing your Nokia Body in Bluetooth limits the features and screens available. For example, you can't use the Weather screen and the Steps screen, as they require access to the Internet.

You can change the configuration of your Nokia Body anytime you want. Refer to [“Changing the Configuration of Your Nokia Body” on page 20](#) for more information.

Note that once you've installed your Nokia Body on your account, all the users of the account can use it. You are also free to install it on various accounts. There is, however, a limit of eight users per scale at the moment.

I'm new to Health Mate®

1. Pull the tab out of the battery compartment if it's the first time you install your Nokia Body.

2. Open the Health Mate® app.

3. Tap **Get Started**.

4. Tap **I'm setting up my device**.

5. Tap **Scales**.

6. Tap **Nokia Body**.

7. Tap **Install**.

8. Press the button at the back of the scale for three seconds and tap **Next**.

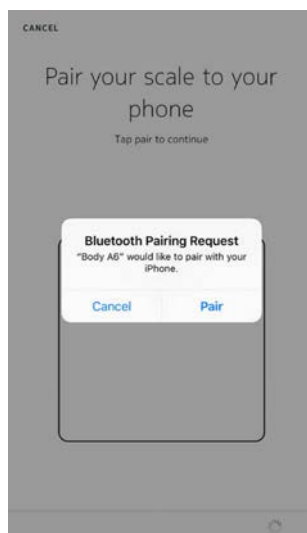

9. Tap **Next**.

10. Tap **Pair**.

11. Tap **Pair**.

12. Tap **Next**.

13. Enter your email and password. Tap **Create**.

14. Tap **Change the avatar** if you want to change it.

15. Tap **Next**.

You have the possibility to add a family member if you want to.

16. To install your scale in Wi-Fi, perform the following steps:

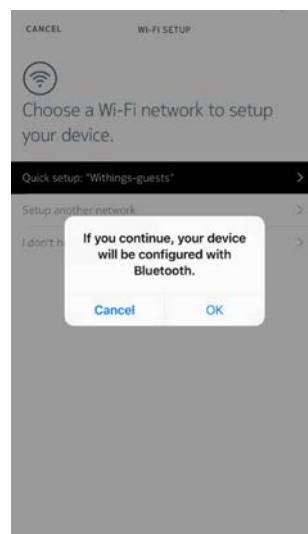

- a. Tap **Quick setup** to use the same Wi-Fi network as your mobile device or **Setup another network** to use another one.

- b. Tap **Allow**.

You will need to update the Wi-Fi configuration if you change the network name or password. Refer to [“Changing the Configuration of Your Nokia Body” on page 20](#) for more information.

17. To install your scale in Bluetooth, tap **I don't have a Wi-Fi Network**.

18. Tap **OK**.

19. Tap **Close**.

The Health Mate® now prompts you to select your target weight. Tap **Cancel** if you don't want to set a weight goal. You can set one later on if you change your mind. Refer to [“Changing Your Weight Goal” on page 28](#) for more information.

The Nokia Body is updating and restarting.

20. Tap **Done**.

I already have a Health Mate® account

1. Pull the tab out of the battery compartment if it's the first time you install your Nokia Body.

2. Open the Health Mate® app.
3. Go to **My devices**.
4. Tap **+**.

5. Tap **Scales**.

6. Tap **Nokia Body**.

7. Tap **Install**.

8. Press the button at the back of the scale for three seconds and tap **Next**.

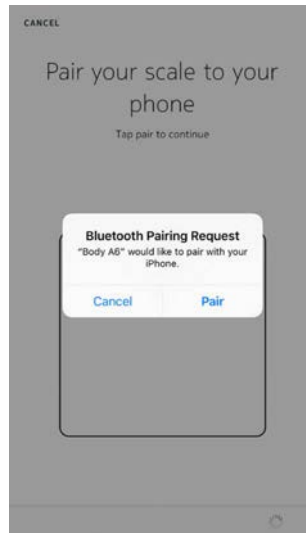

9. Tap **Next**.

10. Tap **Pair**.

11. Tap **Pair**.

12. Tap **Next**.

13. To install your scale in Wi-Fi, perform the following steps:

- a. Tap **Quick setup** to use the same Wi-Fi network as your mobile device or **Setup another network** to use another one.

b. Tap **Allow**.

You will need to update the Wi-Fi configuration if you change the network name or password. Refer to [“Changing the Configuration of Your Nokia Body” on page 20](#) for more information.

14. To install your scale in Bluetooth, tap **I don't have a Wi-Fi Network**.

15. Tap **OK**.

16. Tap **Close**.

The Nokia Body is updating and restarting.

17. Tap **Done**.

The Health Mate® now prompts you to select your target weight.

Selecting your weight goal

To select your weight goal, perform the following steps:

1. Tap and slide up or down to select your target weight.

2. Tap **Next**.
3. Tap and slide up or down to select the pace at which you want to achieve your weight goal.

4. Tap **OK**.

Changing the Configuration of Your Nokia Body

You may need to change the configuration of your Nokia Body:

- If you want to use a different Wi-Fi network,
- If you want to switch to a Wi-Fi configuration,
- If you want to switch to a Bluetooth configuration.

To change your configuration, perform the following steps:

1. Open the Health Mate® app.
2. Go to **My devices**.
3. Tap **Nokia Body**.

4. Tap **Update Wi-Fi Configuration**.

5. Press the button at the back of the scale and tap **Next**.

6. Tap **Next**.

7. To install your scale in Wi-Fi, perform the following steps:
a. Tap **Quick setup** to use the same Wi-Fi network as your mobile device or **Setup another network** to use another one.

- b. Tap **Allow**.
8. To install your scale in Bluetooth, tap **I don't have a Wi-Fi Network**.

9. Tap **OK**.
10. Tap **Close**.

Changing the Settings of Your Nokia Body

Changing the weight unit

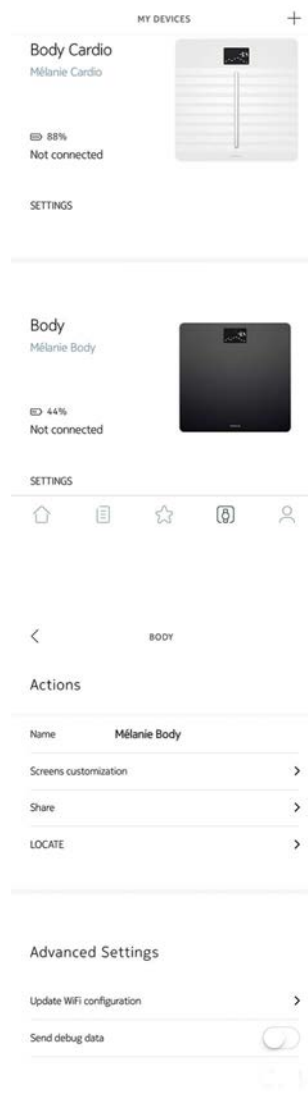

You have the choice between three weight units: kilogram (kg), stone (stlb) and pound (lb). To change the units on your Nokia Body, perform the following steps:

1. Press and hold the button at the back of your Nokia Body for a few second.
2. Press the button again to change the unit.
3. Check the screen of your scale to see the unit change. The unit change is confirmed a few seconds after you stop pressing the button.

Changing the screen order

You can change the order of the screens of your Nokia Body, for example if you want to display the Weather or BMI screens first. To do so, perform the following steps:

1. Open the Health Mate® app.
2. Go to **My devices**.
3. Tap **Nokia Body**.

4. Tap **Screens customization**.

5. Tap the user profile for which you want to change the screen order.

6. Select the screens you want to display:

- Tap the black circles on the left to hide a screen.
- Tap the empty circles on the left to display a screen.

7. Tap and hold the icon on the right to drag a screen up or down.

8. Tap the back button to confirm.

9. Weigh yourself once to synchronize your Nokia Body with your app and finalize the change.

The change will be effective for your next weigh-in.

Changing the location of your scale

The location of your scale is used to provide you with the correct weather forecast if you have activated the Weather screen. It is based on your IP address but it is not always accurate. If the preset location of your scale happens to be incorrect, you are free to change it anytime you want. To do so, perform the following steps:

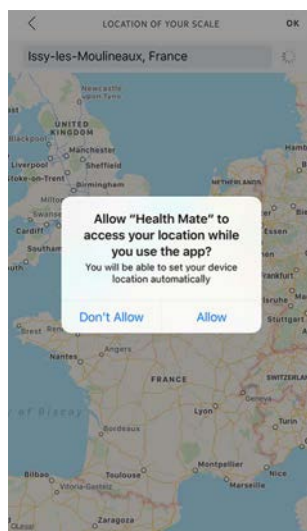

1. Open the Health Mate® app.
2. Go to **My devices**.
3. Tap **Nokia Body**.

4. Tap **Locate**.

5. Tap **Allow**.

6. Tap **OK**.

Tracking Your Weight

Overview

The Nokia Body allows you to track your weight and Body Mass Index (BMI). It also lets you see how your weight trend changes over time.

Make sure you follow the recommendations below to get accurate and representative weight measurements:

- Make sure you always weigh yourself around the same time to improve the consistency of your measurements.
- Wait five seconds before weighing yourself if you have just moved your scale.
- If your scale is on a carpet, make sure you're using the carpet feet. Refer to [“Installing the Carpet Feet” on page 45](#) for more information.

Weighing Yourself

Thanks to the Position Control™ technology, getting an accurate weight measurement has never been easier. If your weight is not properly distributed on your Nokia Body, arrows are displayed on the scale to indicate in which direction you should lean to stabilize your weight.

If several users have a similar weight, the following screen can be displayed:

Simply lean left or right to select the correct name.

Retrieving Your Weight Data

As soon as you weigh yourself, your weight is displayed on the display of your scale. If you've activated the Weight Trend screen, you'll also see a graph showing your eight last measurements as well as the delta between the latest measurement and the previous one.

To see detailed graphs about your weight and see your full history, you have to check your data on the Health Mate® app.

You can access your graphs:

- By tapping the Weight widget on your Dashboard.
- By tapping any weight measurement item in your Timeline.

Once you're viewing the weight graph, you can alternate between the tabs to view your weight graph and your BMI graph.

Changing Your Weight Goal

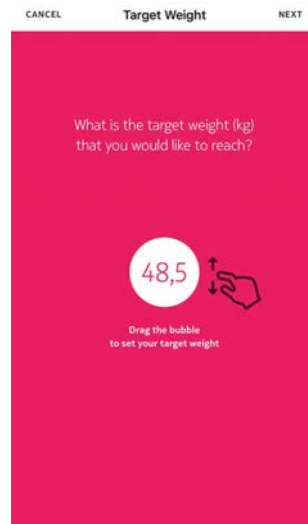

To change your weight goal, perform the following steps:

1. Open the Health Mate® app.
2. Select the **Dashboard** view.

3. Tap **Weight**.

4. Tap and slide up or down to select your target weight.

5. Tap **Next**.
6. Tap and slide up or down to select the pace at which you want to achieve your weight goal.

7. Tap **OK**.

Retrieving unknown measurements

If your Nokia Body doesn't recognize you when you weigh in, your weight measurements will be listed as unknown measurements. To assign them to a user, perform the following steps:

1. Open the Health Mate® app.
2. Go to **My devices**.

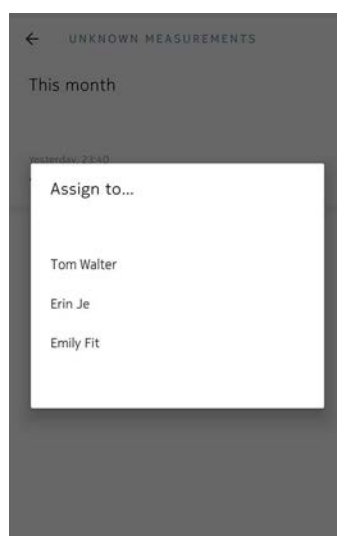

3. Tap **Unknown measurements**.

4. Select the **Unknown measurement**.

5. Tap the user you want to assign the measurement to.

Checking the Weather

Overview

You can check the local weather forecast for the day directly on your Nokia Body if the following conditions are met:

- Your Nokia Body is set up in Wi-Fi. Refer to [“Changing the Configuration of Your Nokia Body” on page 20](#) for more information on how to switch to a Wi-Fi configuration.
- The Weather screen is enabled. Refer to [“Changing the screen order” on page 23](#) for more information.

Retrieving Weather Information

All you have to do to retrieve weather information on your Nokia Body is to step on the scale and wait for the Weather screen to be displayed.

The Weather screen provides you with information about the average weather and temperature for the morning (between 6:00 AM and 12:00 PM) and for the afternoon (between 12:00 PM and 9:00 PM).

If you weigh yourself in the morning, the data of the day is displayed. If you weigh after 7:00 PM, the data of the next day is displayed.

Using Baby mode

Baby mode allows you to find out the weight of your baby by weighing yourself on the scale while holding your baby. To use this mode, you must create a profile for your baby in the Health Mate® app. Then enter the height and weight of your baby and weigh yourself while holding your baby in your arms. The weight of your baby will be automatically detected by the scale.

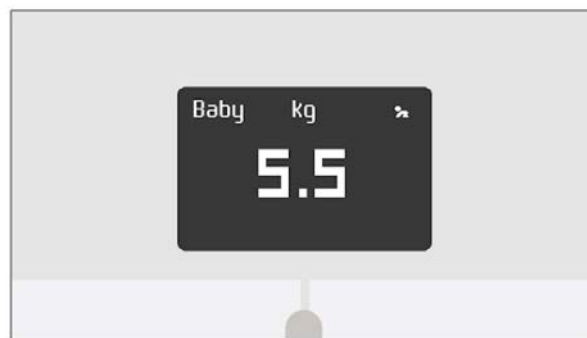

Important: your baby must weigh between 7 and 33 lbs (3 and 15 kg) to be detected by the scale. As Baby mode is enabled by default on the Nokia Body, you do not need to enable it in the Health Mate® app.

Follow the steps below to use Baby mode:

1. Create a profile for your baby in the Health Mate® app.
2. Enter the height and weight of your baby.
3. Weigh yourself on your own.
Your weight will be displayed on the screen of the Nokia Body.

4. Weigh yourself with your baby (within 5 minutes of first weighing yourself).
The scale will display your weight plus your baby's weight, followed by the weight of your baby on its own.

For best results, we recommend you to weigh yourself when your baby is calm.

Note: you can use Baby mode for several members of your family. For example, you may wish to add a profile for your baby to your account or create a separate account for your baby. Please note that you can add up to 8 users to your Nokia® account.

Using Pregnancy Mode

Pregnancy Mode provides an enriched Health Mate experience for pregnant women, offering advice, tips, and easy weight tracking throughout pregnancy.

Pregnant women will receive the following information on a weekly basis in their Health Mate Timeline:

- an overview of the week with the current stage of pregnancy and cumulative weight gain, along with how it compares with your personalized recommendations
- health-related and obstetrician-reviewed information relevant to the current week of pregnancy

Activating Pregnancy Mode

Pregnancy Mode can be activated by any woman at any time during pregnancy. To do so, perform the following steps:

1. Open the Health Mate® app.
2. Go to **Wellness Programs**.
3. Tap **Learn more**.

4. Tap **Join**.

Pregnancy Tracker

Every pregnancy journey can use a reliable guide. Get quality information and weekly weight insights to help you stay on track and healthy.

Linking Your Account to Partner Apps

Linking Your Account to MyFitnessPal

Overview

When you monitor your weight, it can also be useful to monitor your calorie intake with apps such as MyFitnessPal to help you reach your weight goal.

Once you link both accounts, your Nokia® account will be able to retrieve your daily calorie intake from MyFitnessPal. You can then check the MyFitnessPal widget from your Dashboard to see your calorie balance.

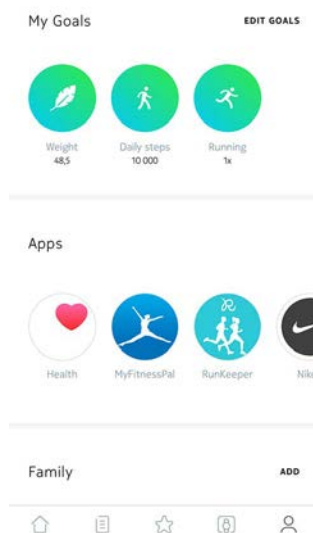

MyFitnessPal can also retrieve information from your Nokia® account: your weight and your calorie intake.

Your calorie intake is based on any activity data coming from a Nokia® activity tracker or the in-app tracking feature of the Health Mate® app. Note that tracking your activity can be a great way to help you achieve your weight goal.

Connecting to MyFitnessPal

To connect your Nokia® account to your MyFitnessPal account, perform the following steps:

1. Open the Health Mate® app.
2. Tap **Profile**.
3. Tap **MyFitnessPal**.

4. Tap **Open**.
5. Log in to your MyFitnessPal account.

You can unlink your MyFitnessPal account and your Nokia® account anytime you want from your Profile.

Linking Your Account to Nike+

Overview

If you have a Nike+ account, you can start the day by seeing your NikeFuel of the previous day displayed on your Nokia Body and in the Health Mate® app thanks to the Nike+ integration.

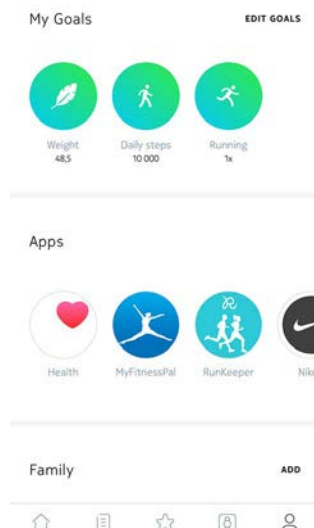

Only your NikeFuels can be shared with your Nokia® account. You'll have to stick to the Nike+ app to see the rest of your Nike+ data.

Note that it can take up to 48 hours after the association for your data to be shared with your Nokia® account. You also need to have at least 5 days worth of Nike+ data before it can be shared with your Nokia® account.

Connecting to Nike+

To connect your Nokia® account to your Nike+ account, perform the following steps:

1. Open the Health Mate® app.
2. Tap **Profile**.

3. Tap **Nike+**.

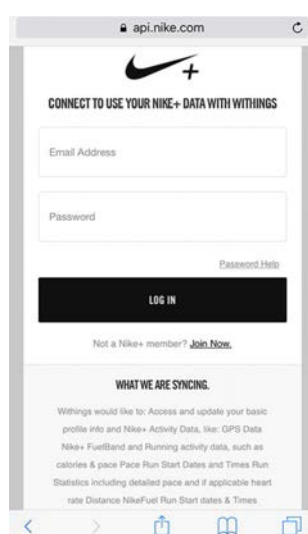

4. Tap **Connect**.

5. Tap **Link with Nike+ FuelBand**.

6. Log in to your Nike+ account and follow the instructions.

Note that it can take up to 48 hours after the association for your data to be shared with your Nokia® account.

You can unlink your Nike+ account and your Nokia® account anytime you want from your Profile.

Syncing Your Data

Data from your Nokia Body is automatically synced, without any action required on your part. Your weight data is synced with the Health Mate® app within a few minutes after you weigh in.

- 14 hours after your last weigh-in and then every 14 hours (default behavior)
- Once a night (if the Steps screen is activated)

If you've set up your Nokia Body in Bluetooth, we advise that you weigh in regularly.

Dissociating Your Nokia Body

All data that wasn't synced before dissociating your Nokia Body will be lost permanently.

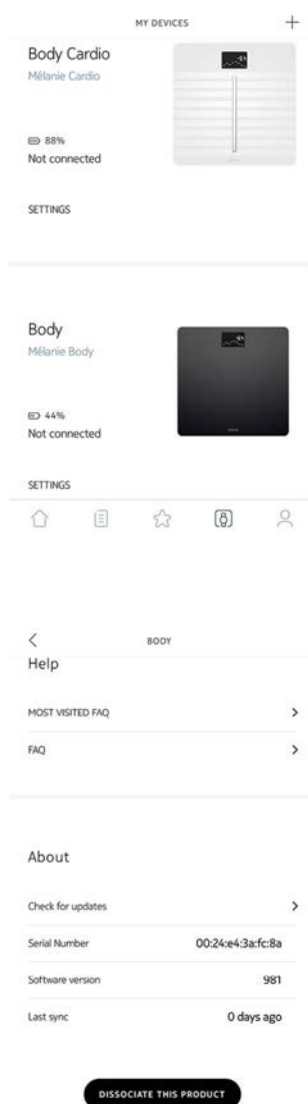

Dissociating your Nokia Body allows you to remove it from your account.

Dissociating your Nokia Body will not remove any of the data that was synced from the Health Mate® app.

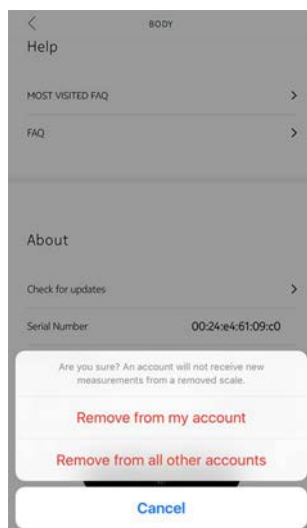

To dissociate your Nokia Body, perform the following steps:

1. Open the Health Mate® app.
2. Go to **My devices**.
3. Tap **Nokia Body**.

4. Tap **Dissociate this product**.

5. Tap **Remove from my account**.

6. Perform a factory reset of your Nokia Body. Refer to [“Performing a Factory Reset of Your Nokia Body”](#) on page 43 for more information.

Performing a Factory Reset of Your Nokia Body

All data that wasn't synced before factory resetting your Nokia Body will be lost permanently.

Factory resetting your Nokia Body allows you to delete the data stored on it. Factory resetting completes the dissociation process.

Factory resetting your Nokia Body will not remove any of the data from the Health Mate® app.

1. Go to the Bluetooth settings of your device and “forget” your Nokia Body from the list of Bluetooth devices.
2. Remove one of the batteries for ten seconds.
3. Put the battery back.
4. When “Hello” appears on the display of your scale, press and hold the unit button at the back of the scale for 20 seconds until “Factory” appears.

At this time, you can start the installation process for the Nokia Body. Refer to [“Setting Up the Nokia Body” on page 8](#) for more information.

Cleaning and Maintenance

Cleaning Your Nokia Body

You can clean your Nokia Body using a cloth dampened with water. If water is not enough to clean it, you can also use crystal vinegar.

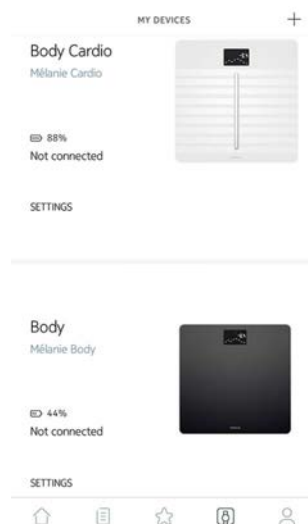

Do not, under any circumstance, use any solvent to clean your Nokia Body.

Changing the Batteries

Your Nokia Body uses four standard AAA batteries and has an autonomy of 12 months. To check the battery level of your Nokia Body, perform the following steps:

1. Open the Health Mate® app.
2. Go to **My devices**.
3. Check the battery level displayed on the left.

If the battery level is below 20% and you're having syncing issues, we advise that you change the batteries.

Installing the Carpet Feet

If you are using your Nokia Body on a carpet, we recommend that you use the carpet feet included with your scale. To do so, perform the following steps:

1. Remove the tab below each carpet foot.

2. Stick each carpet foot on the Nokia Body feet.

Updating Your Nokia Body

We regularly offer new firmware so that you can benefit from the latest features we add to our products. When new firmware is available, it is automatically installed without any prompt from the Health Mate® app (only in Wi-Fi).

However, you can check if updates are available and force their installation whenever you want. To do so, perform the following steps:

1. Open the Health Mate® app.
2. Go to **My devices**.

3. Tap **Nokia Body**.

4. Tap **Check for updates**.

5. Press the button at the back of the scale and tap **Next**.

6. Tap **Upgrade**.

7. Tap **Close** when the upgrade is complete.

Note: You can check which firmware version your Nokia Body uses in **My devices > Nokia Body**.

Weight

Your weight is measured thanks to four weight sensors placed below the surface of your Nokia Body.

Body Mass Index

The Body Mass Index (BMI) is calculated based on your weight and height. It is an international standard adopted by the World Health Organization which helps evaluate the health risks linked to abnormal weight.

Generally speaking, a BMI between 18 and 25 is considered as “normal”, meaning that weight-related risks to your health are low. Please note, however, that BMI is only an indicator, and that it doesn’t take into account a person’s morphology.
