

BABY SCALES: AV-10/20-EC-SERIES

Digital Baby Scales for hospitals, health authorities, special centres, etc.

FEATURES

- New software for more stable reading
- High Precision models with 1-2 g accuracy
- EC Type approved
- Easy operation and excellent performance
- Easy to clean
- Compact design
- Head and side protection

Digital Baby Scale AV-10/20-EC is a rugged and high accuracy digital scale, made in Sweden. The scale design is very hygienic. It is composed of an acrylic plastic platform, and is comprised of an anodised aluminium base construction. The Scale calculates an average value shown on the display. It comes supplied with a battery-eliminator.

The AV-20-EC is suitable for use in normal conditions such as hospitals, health authorities, special centres, homes, etc.
